

Old vs corrected: the new findings (mean and 95% CI over worlds; the new value coloured by its classification)

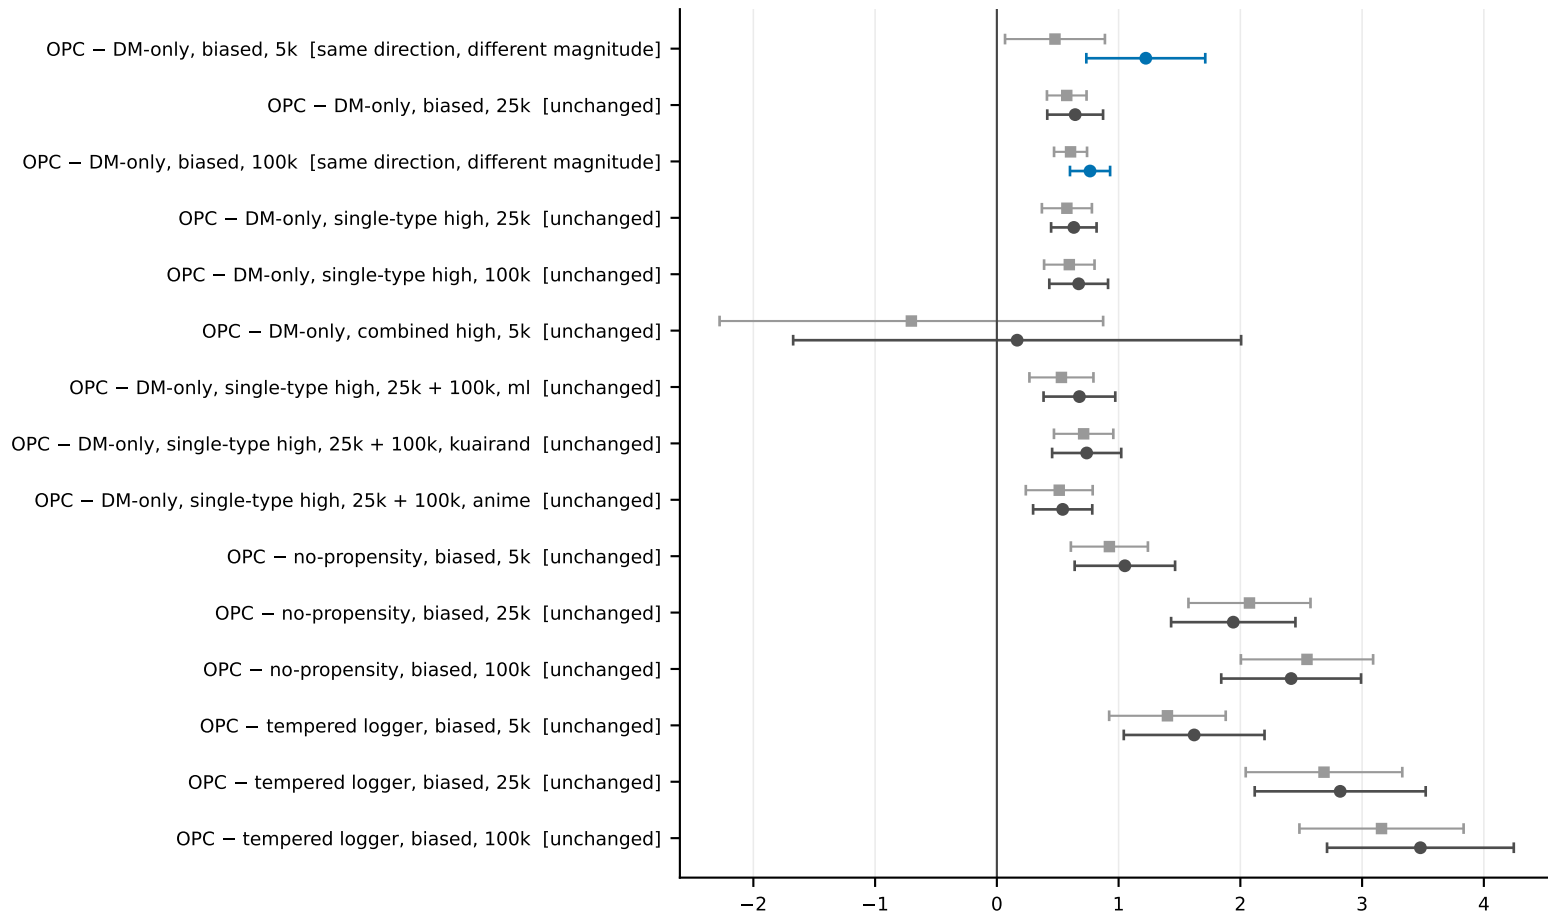

Stage 2 recovery (fraction of the oracle ranking repair, greedy; biased worlds unless named)

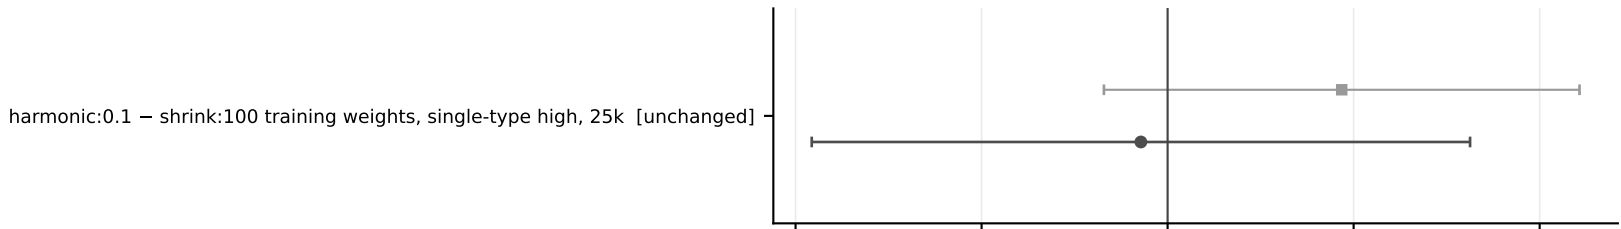

Logging support at 25k (difference in OPC's fraction of the oracle repair)

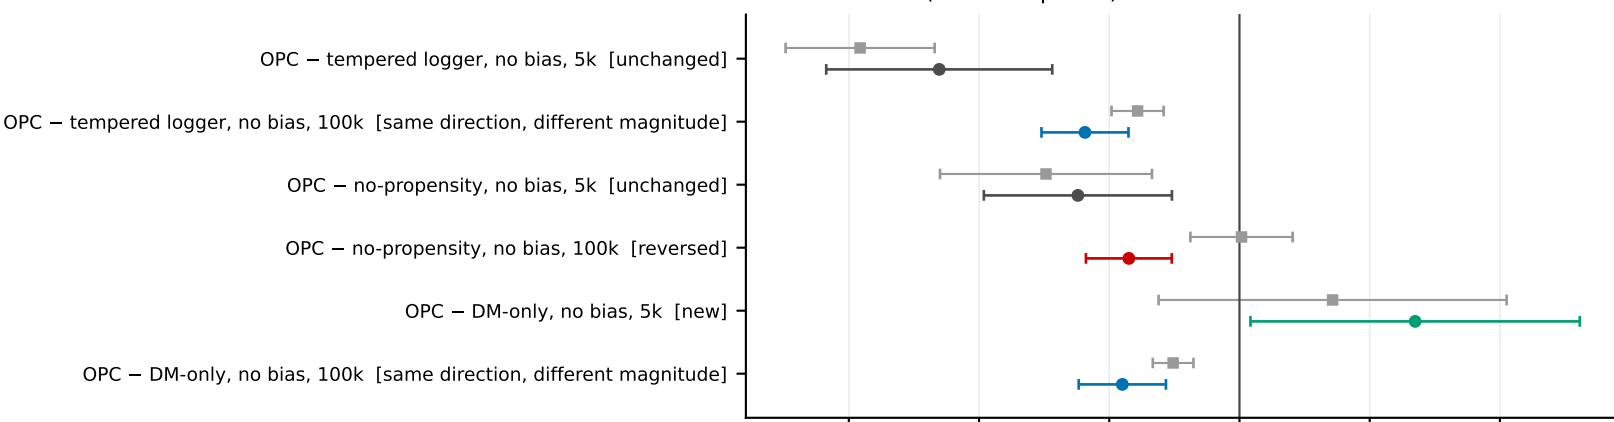

Stage 2: OPC minus each baseline (true CTR points)

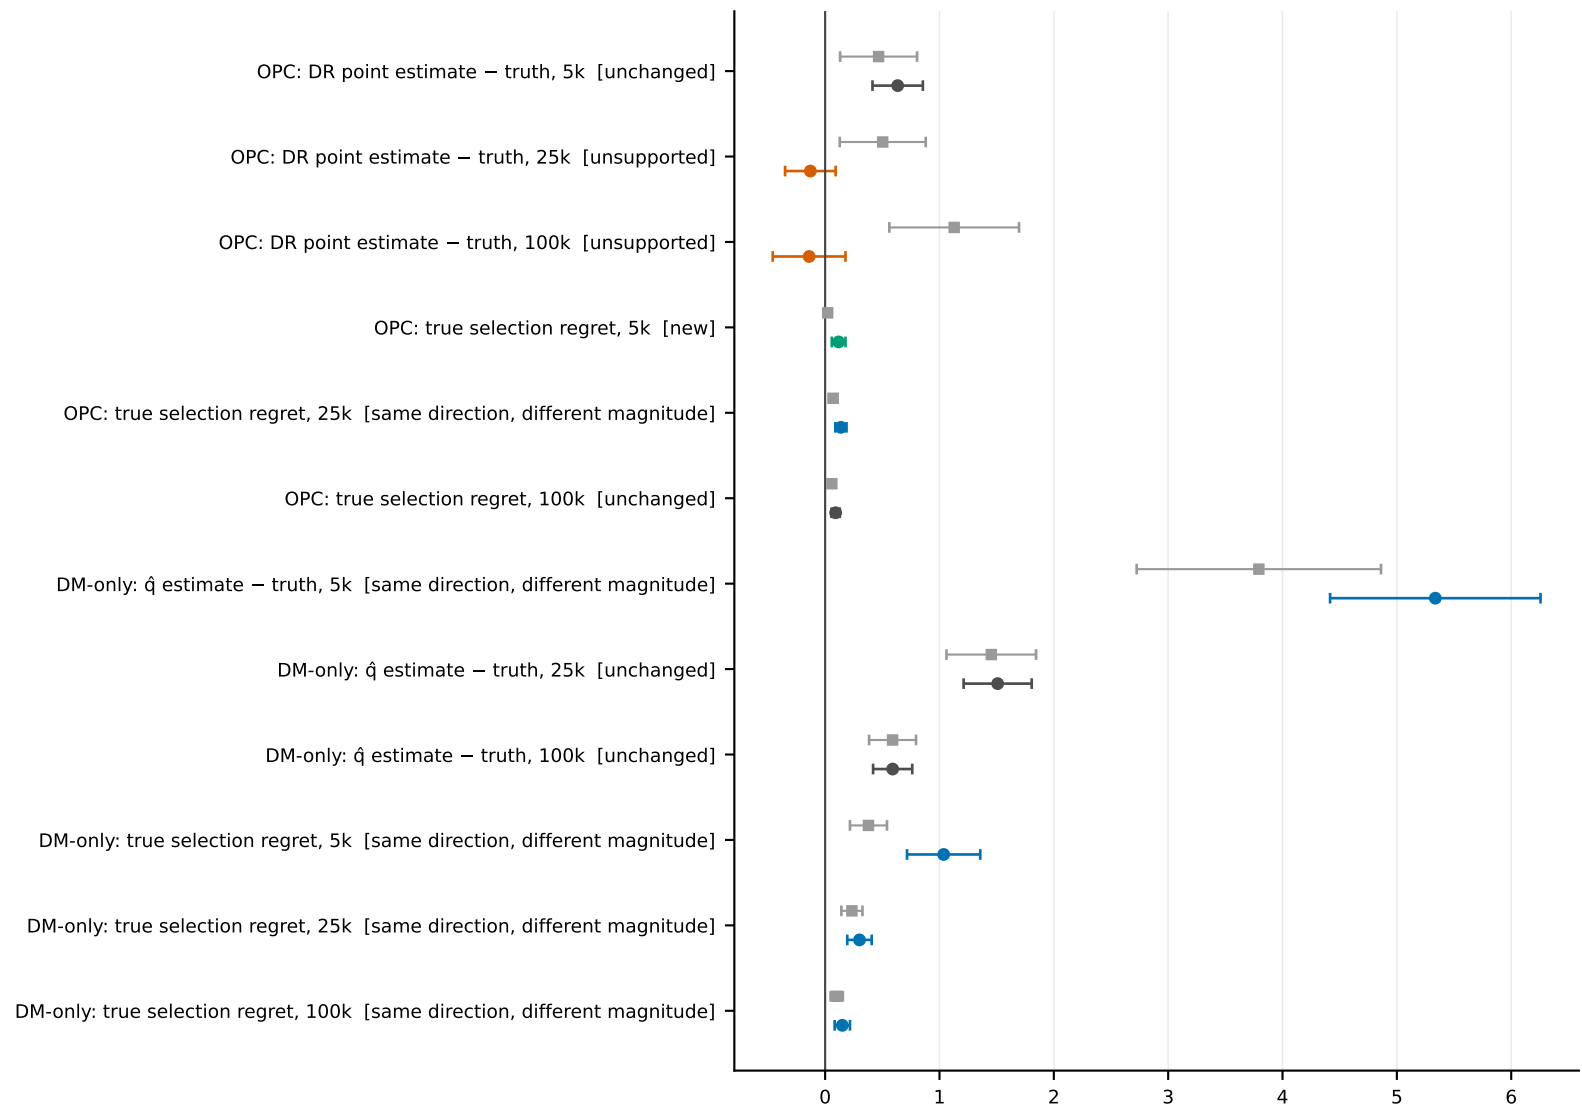

Importance weighting (true CTR points)

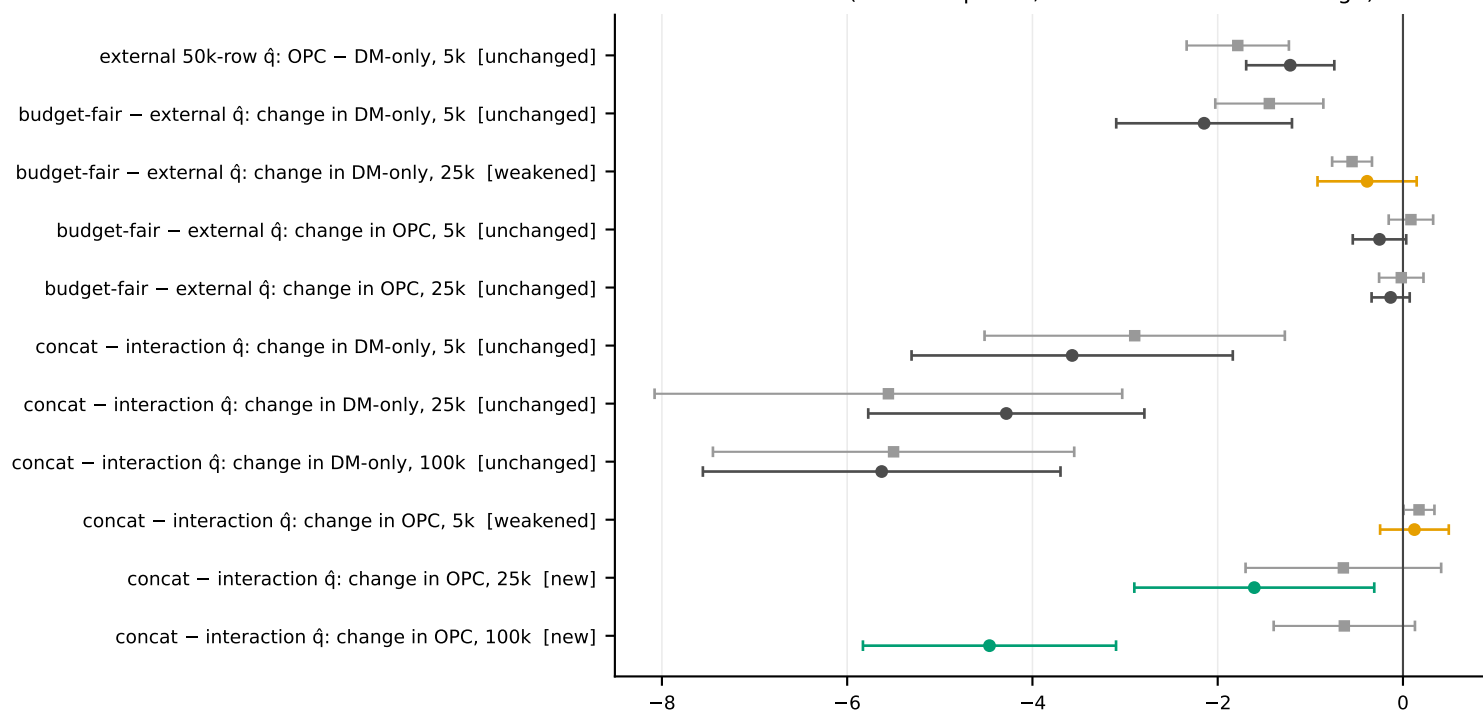

No-bias control (true CTR points)

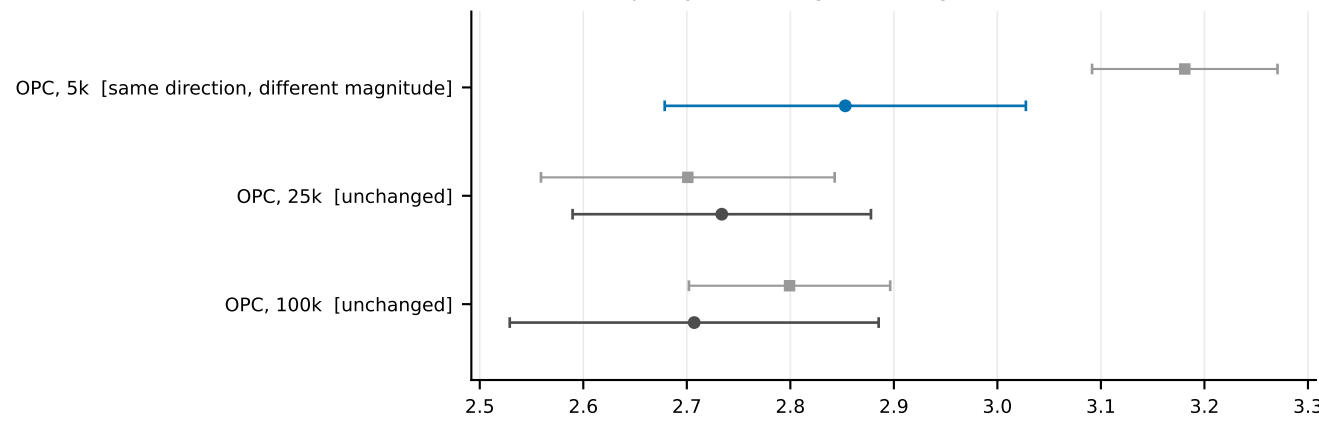

Selection (true CTR points; biased worlds)

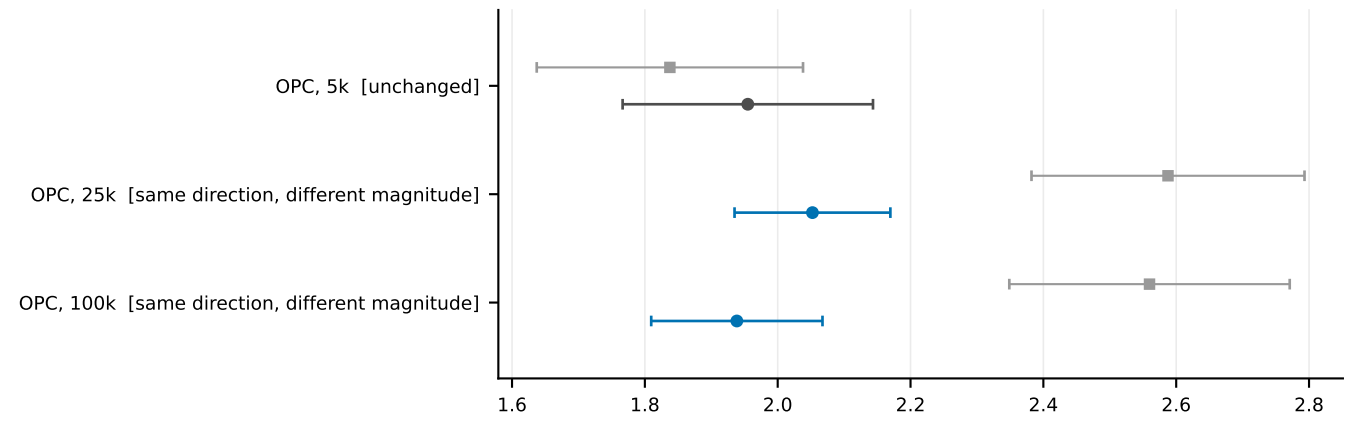

Reward-model tests (true CTR points; combined medium and high)

Selected OPC policy's raw-weight ESS (log10; biased worlds)

Selected OPC policy's share of weights above 10 (%; biased worlds)

old (buggy logs)

new: unchanged

new: same direction, different magnitude

new: weakened

new: unsupported

new: reversed

new: new
